Genentech Inc.

South San Francisco, California

Number of Positions: 4–6

Type of Student: Graduate students pursuing PhD degree in statistics, biostatistics, or related fields

Deadline for Applying: January 26, 2018

Genentech is a leading biotechnology company that discovers, develops, manufactures, and commercializes biotherapeutics for patients with significant unmet medical needs. At Genentech, we are passionate about finding solutions for people facing the world’s most difficult-to-treat medical conditions. Our founders believed that hiring talented, enthusiastic people would make Genentech a success. Today, we still believe our employees are our most important asset.

The biostatistics summer interns will work for 10–12 weeks under the supervision of experienced biostatisticians on theoretical or applied problems with direct relevance to ongoing clinical or nonclinical drug development in diverse therapeutic areas such as oncology, immunology, infectious disease, ophthalmology, and neuroscience. The specific topics may cover research problems from translational research to late-stage clinical trials and post-marketing evaluations.

Applicants must be at least 18 years old and current graduate students pursuing a PhD in statistics, biostatistics, or related field who have completed at least one year of graduate work by May 2018 and who will be returning to school in the fall of 2018. The applicant must be legally authorized to work in the US. In addition, applicants should have good working knowledge of R, S-Plus, or SAS and have good communication skills.

Contact: Send CV, personal statement of interest, and a letter of recommendation to gnebiostatsummerintern@gene.com
